Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-48 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-55 of copending Application No. 09/906576. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant independent claims

are drawn to: (a) a composition comprising a glycoprotein matrix bound to an ubiquinone; (b) a nutritional supplement comprising an ubiquinone bound by a glycoprotein matrix ; (c) a method of preparing an ubiquinone-containing composition comprising binding a glycoprotein matrix to at least one ubiquinone; (d) a method of improving bioactivity and stability of an ubiquinone comprising binding glycoprotein matrix to said ubiquinone and (e) a method of delivering an ubiquinone to a host comprising binding said ubiquinone with a glycoprotein matrix to form a bound ubiquinone-containing composition and administering said ubiquinone-containing composition to said host, while the copending's independent claims are drawn to: (a) a composition comprising a glycoprotein matrix bound to a biologically active agent; (b) a nutritional supplement comprising an active ingredient bound by a glycoprotein matrix; (c) a method of preparing a glycoprotein-matrix containing composition comprising binding a glycoprotein matrix to at least one active ingredient; (d) a method of improving bioactivity and stability of a biologically active ingredient comprising binding glycoprotein matrix to said active ingredient and (e) a method of delivering a biologically active ingredient to a host comprising binding said active ingredient with a glycoprotein matrix to form a glycoprotein matrix bound biologically active composition and administering said composition to said host.

Clearly, the claims of the two applications are not patentably distinct, as those of the instant are a subset of the broader claims of the copending application. This breadth is primarily from the use of "biologically active ingredients" in the copending versus "ubiquinone" (a biologically active ingredient) in the instant.

Art Unit: 1651

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
